LinkedIn: <https://linkedin.com/in/sharad-singh27>

TECHNICAL SKILLS

Statistical & Machine Learning: Logistic Regression, Random Forest, Ada-Boost, K-Means, DBSCAN, Multivariate Regression, Time Series Analysis, Feature Engineering

Programming Languages & Tools: Python (Advanced), R, SQL, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau, Advanced Excel

Backend & DevOps: Django, Flask, API Development, REST Architecture, Git, GitHub, CI/CD Pipeline

Soft Skills: Statistical Leadership, Data-Driven Decision Making, Team Management, Stakeholder Communication, Problem-Solving, Mentoring

PROFESSIONAL EXPERIENCE

Data Analyst | BCD Travel | Bangalore, India

May 2023 - Present

- Conducted advanced clustering analysis on 50,000+ employee records using K-Means and Hierarchical Clustering to identify behavioral segments and usage patterns
- Built predictive models using Logistic Regression and Random Forest forecasting employee productivity with 85%+ accuracy
- Designed "what-if" scenario analyses using multivariate regression to simulate policy impact on workforce efficiency
- Analyzed 500K+ daily usage logs extracting task completion patterns and efficiency bottlenecks
- Engineered 15+ ETL data pipelines cleansing and enriching transactional data from multiple sources
- Designed real-time dashboards using Power BI/Tableau reducing reporting time by 60%
- Ensured 99%+ data accuracy through comprehensive validation protocols.

Full Stack Web Developer & Data Analysis Engineer | TECH I.S. | Bangalore, India

March 2022 - February 2023

- Engineer and Team Coordinator for 15 projects and 3 tools serving internal and external clients
 - Spearheaded data analysis initiatives and predictive modelling resulting in 70% business flow increase
 - Developed 8-month strategic plan using statistical forecasting models meeting monthly targets
 - Led engineering team managing 15+ projects with 95%+ client satisfaction
 - Managed and mentored 5+ team members ensuring on-time delivery
 - Trained 100+ US-based clients in advanced analytics, Python, and data visualization
 - Developed 8 enterprise-grade projects using Django, Flask, and React.js
 - Implemented data pipeline automation reducing manual reporting overhead by 50%
-

KEY PROJECTS

- Predictive Modelling for Business Intelligence: Employee attrition prediction with 87% precision using Logistic Regression & Random Forest (Python, Scikit-learn, SQL, Power BI)
 - Customer Segmentation & Clustering Analysis: K-Means and DBSCAN clustering on 50,000+ records identifying 6 segments, increasing campaign ROI by 35% (Python, Pandas)
 - EDA & Feature Engineering Project: Exploratory analysis and data cleansing on transactional datasets (
 - https://github.com/sharad1127/EDA_project
 -)
 - Business Workflow Automation Application: Automation workflows with advanced reporting (Power Apps, Power Automate, SQL Server)
 - Personal Portfolio Website: Full-stack analytics dashboard (Django, React.js, MySQL)
-

EDUCATION & CERTIFICATIONS

Bachelor of Technology in Mechanical Engineering | PRIST University, Thanjavur | 2014 - 2018 | GPA: 7.2

Full Stack AI & Data Science Certification | Naresh IT | 2021

Python Developer Certification | Naresh IT, Hyderabad | 2021
